

LETTER OF RECOMMENDATION

I'm excited to share my recommendation for Ms. R. Harsita, who completed her undergraduate studies in Computer Science Engineering at SRM Institute of Science and Technology. As her class in charge, I have had the privilege of mentoring and encouraging Harsita both academically and personally during her four years at our institution.

During her time at SRM, she consistently stood out due to her strong commitment to her studies and remarkable academic performance. Her enthusiasm for design was evident through her active involvement in many seminars. Her active participation in class and asking the right questions gave way to enriching discussions in class and helped her peers to improve.

Harsita's thirst for knowledge was evident in her enthusiastic participation in many workshops like flutter, cyber security, etc. and extracurricular activities. She had a knack for grasping new concepts quickly and genuinely relished expanding her knowledge. It's these qualities that make her an excellent fit for your esteemed University's Master's program. One project that stood out as a testament to Harsita's commitment was her work on a school administration database. Even though it was a relatively straightforward task for students, Harsita went the extra mile to ensure the website was not just functional but visually appealing.

In addition to her academic achievements, Harsita was actively engaged in extracurricular activities, including coordinating and managing college functions like annual day, technical symposium, etc. This showcased her strong leadership and organizational skills, and her ability to strike a balance between academic excellence and active involvement in university events.

She underwent a six-month internship and later joined HP as a software developer. Over there, she worked on several UX design projects, demonstrating a sharp sense of design, and a deep grasp of colour psychology. She also excelled in paying close attention to details, a critical aspect of UX Design. Beyond her technical skills, Harsita possesses excellent communication, collaboration, and research abilities, crucial for success in the UX Design field. What truly sets her apart is her innate curiosity about the design of everyday things. I'm confident her desire to learn and her aspiration to contribute to the field of UX Design will drive her to excel in your program.

In conclusion, I wholeheartedly recommend Harsita for your Master's program at your esteemed university. Her exceptional academic record, practical experience, artistic talents, and unwavering commitment to design make her an ideal candidate. With further nurturing, she's destined to become an outstanding professional. I have every confidence that Harsita will excel in your program and make a significant contribution to the field of UX Design. I will be glad to answer any additional queries that you might have.

Sincerely,

Dr. S. Manohar

Assistant Professor

Department of Computer Science and Engineering

SRM Institute of Science and Technology
